

THE NEW PX 7 | OVER-EAR & NOISE CANCELLING

THE PUREST LISTEN

Wherever you go, experience music at its highest level. No matter where you are, powerful drivers and adaptive noise cancelling put you in the center of the music.

Bowers & Wilkins

PX 7

WIRELESS OVER-EAR HEADPHONES WITH ACTIVE NOISE CANCELLATION

Built from legend

Drivers that push the sound forward. The 43mm drivers in the PX 7 are the largest in our headphone collection, built and tuned by the same engineers behind the Bowers & Wilkins 800 Series Diamond speakers used in Abbey Road Studios.

30 hours of possibility

You can do a lot in 30 hours. You could fly from California to London and back, with some time to spare. You could also start a band or see every stage at the festival, twice. Listen uninterrupted on a single battery charge. And if that's not enough, a 15 minute quick charge gets you six more hours.

Inspired by race cars

The carbon fiber composite arms of the PX 7 mimic the strength and durability of the fastest vehicles in the world, channeling pure sound to you and holding up against everyday wear and tear. So throw them in your overnight bag or your work bag and get ready to plunge into sound.

Cancels noise clean out

Adaptive Active Noise Cancelling that automatically responds to your environment to keep the outside world out of the music.

Follows your lead

The PX 7 obeys your every move. Lift an ear cup to hear what's happening around you, and the music automatically stops. Put it back, and the music plays on.
